RATES

I shoot a lot of sports and other events on my own and put the images on my website. Many customers get lucky and find photos they are interested in simply by browsing through my work.

But to be sure to get the images you want, I can come to your game or event and specifically photograph the participants that are important to you. I'll get as many quality shots as I can of the individual(s) or team that you specify. Afterwards I'll custom edit each shot and you'll receive full-resolution versions of the final images on a CD.*

Here are the prices:

- High school football game..... \$75.00**
- Other school or league game (90 minutes maximum) \$60.00**
- Other events (1 hour minimum, ½ hour increments after)..... \$60.00 / hour**
- Augmented indoor lighting option (where allowed)..... \$25.00**
Photographing fast-moving action in an indoor gym or arena is very difficult with most cameras. I can get high-quality shots with my state-of-the-art cameras and lenses, but I also have specialized lighting equipment that can make them even better. The catch is that this lighting is not allowed in some venues.
- \$50.00 professional print credit option..... \$25.00**
This option essentially gives you 1/2 off of up to \$50 worth of professional-quality prints (any size) from Mpix Lab when purchased through my website.

Contact me to schedule an event. A deposit of one half of the anticipated total amount is required to reserve the date. The remainder will be due upon delivery of the CD. You will have a chance to view proofs of the images on my website before the final payment. The deposit will be refunded if the event is cancelled or if I am unable to attend.

** You will also receive a license to use the images for personal, non-commercial use, such as making prints, books, slide shows, Facebook galleries, etc. Resale, relicensing, or any other for-profit use is prohibited. Copyright ownership remains with the photographer.*
